Commissioning and integration

Continued overview for Standalone Plus D4E32

05 **First-time start-up**

Gateway connection, web interface, initial connectors and mapping.

Open the manufacturer's official documentation

06 **Supported devices**

Industrial protocols, PLCs and connection requirements for other devices.

Open the manufacturer's official documentation

07 **Database connections**

Database, integration via REST API, and support depending on the specific connector.

Open the manufacturer's official documentation

08 **Backing up the configuration**

Export and import settings; the export does not include historical measured values.

Open the manufacturer's official documentation

Background information for consultation

Please specify the types and firmware of the PLCs or measuring instruments, the available protocols, the number of values, the reading interval and the transmission destination. Please also provide your requirements for Grafana and containerised applications. We will confirm the licence capacity, accessories and price in the quotation.

Product and enquiry

This document has been compiled by FOXON as a reference guide. It is not the original manufacturer's datasheet or manual and does not replace the instructions for a specific device or system version.
