SIEMENS

Data sheet 6GT2391-0AH30

product type designation	**Antenna cable for HF, M8 / M8**
product description	Highly flexible coaxial cable
	SIMATIC RF200/RF300 Antenna connection cable PUR, UL 758, length 3 m trailing plug M8 straight/M8 angled to be connected between reader and antenna.

product brand name	SIMATIC RF
Technical Product Detail Page	https://i.siemens.com/1P6GT2391-0AH30
suitability for use	plug-in cable for connecting a short-range HF antenna ANT 3, 3S, 8, 12, 18, 30 to a reader via M8 plug
cable designation	2YCC11Y 0.9/2.85 LI VZN BK
wire length	3 m
electrical data	
number of electrical connections	2
type of electrical connection	M8 (male, 4 pin, straight) / M8 (male, 4 pin, angled)
impedance	
● rated value	50 Ω
loop resistance per length / maximum	74 mΩ/m
operating voltage	
● maximum	300 V
mechanical data	
design of the shield	Braided shield made of tin-plated copper wires
outer diameter	
● of cable sheath	5.6 mm
material	
● of dielectric	PE
● of cable sheath	PUR
color	
● of cable sheath	Black
bending radius	
● with single bend / minimum permissible	22.4 mm
● with multiple bends / minimum permissible	44.8 mm
● with continuous bending	75 mm
number of bending cycles	3000000
weight per length	51 kg/km
ambient conditions	
ambient temperature	
● during operation	-40 ... +80 °C
● during storage	-40 ... +80 °C
● during transport	-40 ... +80 °C
● during installation	-40 ... +80 °C
fire behavior	flame resistant according to IEC 60332-1-2
radiological resistance / to UV radiation	resistant

security information	
security information	Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement - and continuously maintain - a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
