SIEMENS

Data sheet 6GK1907-0DC00-6AA4

product type designation	**Power M12 Cable Connector PRO**
product description	M12 power socket plug-in connector, 3-pole, S-coded,
	power M12 cable connector PRO for PSP9230PoE with axial cable outlet for assembly in the field, female contact insert, S-coded 1 pack = 1 unit.

product brand name	SIMATIC NET
Technical Product Detail Page	https://i.siemens.com/1P6GK1907-0DC00-6AA4
suitability for use	for connection to PSP9230PoE power supply for 230 V AC power supply
interfaces	
number of electrical connections	
● for network components or terminal equipment	1
type of electrical connection	
● for network components or terminal equipment	M12 plug (female contact insert, S-coded, 3-pin)
type of electrical connection / FastConnect	No
electrical data	
voltage / rated value / maximum	230 V
ampacity / of the contacts / maximum	12 A
mechanical data	
material / of the enclosure	plastic
locking mechanism design	Screwed joint
number of poles	3
connector coding / of the M12 circular connector	S
design, dimensions and weights	
type of cable outlet	180° cable outlet
width	20.2 mm
height	20.2 mm
depth	60 mm
connectable cable diameter	6 ... 8 mm
type of electrical connection / for conductor	screw terminal
● solid	2.5 mm²
● finely stranded / with core end processing	1.5 mm²
ambient conditions	
ambient temperature	
● during operation	-40 ... +85 °C
● during storage	-40 ... +85 °C
● during transport	-40 ... +85 °C
chemical resistance	
● to water	resistant
protection class IP	IP67
product features, product functions, product components / general	
product feature	
● silicon-free	Yes

Subject to change without notice
© Copyright Siemens

product component	
● strain relief	Yes
standards, specifications, approvals	
certificate of suitability	
● RoHS conformity	Yes
● UL approval	Yes
● railway application in accordance with EN 50155	No

security information	
security information	Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement - and continuously maintain - a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
