SIEMENS

Data sheet 6GT2815-2BN15

product type designation	**Antenna cable for UHF, RP-TNC / RP-TNC**
product description	Highly flexible coaxial cable
	SIMATIC RF600 connecting cable for antenna L15; pre-assembled; IP65; trailing ; PE, CMR/MPR, length 15 m.

product brand name	SIMATIC RF
Technical Product Detail Page	https://i.siemens.com/1P6GT2815-2BN15
suitability for use	Plug-in cable for connecting a UHF antenna to an RF600 reader
cable designation	O2YS(ST)CY 1.4/3.7-50LI
wire length	15 m
electrical data	
number of electrical connections	2
type of electrical connection	R-TNC (female, straight) / R-TNC (female, straight)
attenuation factor per length	
● at 900 MHz / maximum	0.288 dB/m
impedance	
● rated value	50 Ω
loop resistance per length / maximum	30 mΩ/m
operating voltage	
● maximum	1000 V
mechanical data	
design of the shield	Braided shield made of tin-plated copper wires
outer diameter	
● of cable sheath	5.5 mm
symmetrical tolerance of the outer diameter / of cable sheath	0.2 mm
material	
● of inner conductor	Cu
● of dielectric	PE
● of cable sheath	PVC
color	
● of cable sheath	Black
bending radius	
● with single bend / minimum permissible	22 mm
● with multiple bends / minimum permissible	44 mm
● with continuous bending	100 mm
number of bending cycles	100000
number of torsion cycles / with torsion by ± 180° on 1 m cable length	3000000
tensile load / maximum	190 N
weight per length	42 kg/km
ambient conditions	
ambient temperature	

Subject to change without notice
© Copyright Siemens

● during operation	-25 ... +80 °C
● during storage	-25 ... +80 °C
● during transport	-25 ... +80 °C
● during installation	-25 ... +80 °C
fire behavior	Flame-resistant in line with UL style 1354 (only cable without plug)
radiological resistance / to UV radiation	resistant

product features, product functions, product components / general

product feature	
● halogen-free	No
● silicon-free	Yes

security information

security information	Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement - and continuously maintain - a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
