auto.spy viewer

auto.spy viewer is a portable software for viewing, marking and measuring auto.spy trace documents. It allows users of auto.spy analyzer to

- ✓ present their recorded signal data to all, who do not have a license of auto.spy analyzer (such as other departments or companies), and
- ✓ use their own license of auto.spy analyzer for recording signals at the shop floor while making first simple analyses of previously logged signal data in the office at the same time.

Range of Functions

The auto.spy viewer is **free** and, hence, has a limited range of functions compared to the auto.spy analyzer. Nevertheless, the auto.spy viewer enables you to

- ✓ view signal traces of any desired length without limitations in signal count,
- ✓ configure signal properties like naming, coloring, or scaling,
- ✓ arrange signals in a stack (one upon the other) in diagram view for easy comparison,
- ✓ measure time spans and signal amplitudes using cursors, and
- ✓ mark and describe important events in the trace by placing flags and time dimensioning.

The auto.spy viewer **lacks** following functions of auto.spy analyzer:

- Recording new signal data
- Importing and exporting signal data
- Deleting unneeded signal data from existing documents
- Finding events using the search function or script-based signal analysis
- Shifting signals in time
- Creating and deleting signal groups

Installation and Redistribution

The auto.spy viewer is available in English and German and consists of only one executable file per language. If you have installed the auto.spy analyzer completely, you will find these files in the installation directory of auto.spy:

- **autospy_viewer_de.exe** for the auto.spy viewer in German language
- **autospy_viewer_en.exe** for the auto.spy viewer in English language

To download the auto.spy viewer separately, please use the following link:
https://www.autospy.de/download/autospy_viewer.zip

tracetronic GmbH, Stuttgarter Str. 3, 01189 Dresden, Germany
Tel. +49 351 205768-555 • Fax +49 351 205768-999 • info@autospy.de • www.autospy.de

You may redistribute the auto.spy viewer without any limitations. Registration or notification is not required. In case of redistribution, you only have to pick and send the executable in the desired language to the recipient. The auto.spy viewer has not to be installed and does not require administrator privileges or any program files of auto.spy analyzer to run.
