SIEMENS

Data sheet 6GT2090-0QB00

product type designation	**Cover for MDS 439E/U 589/RF380T**
product description	Shrouding cover for protecting a heat-resistant transponder
	MOBY I/U/RF300 shrouding cover for MDS 439E/ MDS U589/RF380T.

product brand name	SIMATIC RF
Technical Product Detail Page	https://i.siemens.com/1P6GT2090-0QB00
suitability for use	For protecting the transponder from physical destruction and becoming dirty due to paint
suitability for operation	suitable for support 6GT2090-0QA00
mechanical data	
material	V2A sheet
color	silver
ambient conditions	
ambient temperature	
● during operation	-40 ... +220 °C
● during storage	-40 ... +220 °C
● during transport	-40 ... +220 °C
design, dimensions and weights	
width	140 mm
height	78.5 mm
depth	180 mm

Security information	
security information	Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement - and continuously maintain - a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly
