Data sheet 6GK5908-0UA00-0AA0

SCALANCE CLP 2 GB SINEMA RC removable data storage medium for enabling the connection to SINEMA Remote Connect for SCALANCE MUM85X with CLP slot for simple device replacement in case of failure and for recording of configuration data.

product type designation	
product brand name	SCALANCE
product type designation	CLP 2GB SINEMA RC
product description	SCALANCE CLP 2 GB SINEMA RC removable data storage medium for enabling connection to SINEMA Remote Connect for SCALANCE MUM85X, for easy device replacement in an error case, and for storing configuration data
Technical Product Detail Page	https://i.siemens.com/1P6GK5908-0UA00-0AA0
suitability for use	activation of SINEMA RC
suitability for operation	SCALANCE MUM85x devices
ambient conditions	
ambient temperature	
● during operation	-40 ... +85 °C
● during storage	-40 ... +85 °C
● during transport	-40 ... +85 °C
relative humidity	
● at 25 °C / without condensation / during operation / maximum	95 %
protection class IP	IP20
design, dimensions and weights	
width	17.5 mm
height	7 mm
depth	32 mm
net weight	3.1 g
product feature / conformal coating	No
product features, product functions, product components / general	
storage capacity	2048 Mibyte
standards, specifications, approvals	
MTBF	343 a
range of validity / for MTBF determination	at 25 °C
standards, specifications, approvals / Environmental Product Declaration	
Environmental Product Declaration	Yes
global warming potential [CO2 eq]	
● total	1264 kg
● during manufacturing	0.92 kg
● during operation	0.34 kg
● after end of life	0.0042 kg

security information

security information	Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement - and continuously maintain - a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
